STARTING WELL.

The World's Fair has gotten into Con" gress, and yesterday saw the first move in the game. Chicago, St. Louis and New York were well represented and a good deal of interest was manifested. The result was the adoption of a resolution to the effect that the Speaker appoint a Select Committee of nine men, to be called the World's Fair Committee, to which shall be referred all that relates to the proposed quadri-centennial celebration of the discovery of America.

Mr. FLOWER also introduced his World's Fair bill, which will be referred to this Special Committee when it is appointed.

This is a slight setback for Chicago which wished the matter to be in the hands of the Foreign Affairs Committee. The judicious selection of the nine may be safely left to Mr. REND, and as the nine go to the bat New York may count on enough good batting to win the game.

THE GREAT BILL.

The Children's Bill cannot be too promptly attended to in Albany. It was agitated enough last year to have made its points familiar to most of the legislafors, and now that the patent justice of its demands are sanctioned by the apobation and indorsement of the President of the Society for the Prevention of Cruelty to Children it should not lag

Put it through quickly, gentlemen. There is no reason why a good thing should be accomplished in a listless loitering way. Other things being equal. they act best who act quickest. Show yourselves good actors.

PORTUGAL A SUPPLIANT.

There is a certain pathos in the spec of little Portugal flying to that dear old fairy, Otto von Bismance, showing the ugly stamp of Britain's iron heel upon her tiny frame, and beseeching that festive ogre to turn England into confusion and make it lift its heel.

The sun may never set on Britain's dominion, but it is possible for the sun to rise in the more restricted space of Salismuny's mind. He has treated the poor little Kingdom of Portugal with a snubbiness greater than he would have shown to a powerful African chief.

If BISMARCE will only do something for Portugal!

OUR LITTLE APRICA.

There is a cheerful possibility that the negro problem may find a statesmanlike solution in Okiahoma. There are 20,000 negroes there now, and by the end of Spring the colored population will probably number 50,000.

The Indians, negroes and Chinese are the social features which call for not a little thought in our lay-makers. A broad, just and satisfactory disposition of these three elements in our heterogenous National composition is a task demanding high statesmanship.

NOMS DE PLUME OUT OF DATE.

"Ouide," Mark Twain and Others Now Write Under Their Own Names.

There seems every reason to believe that the day of the nom de plume in literature has gone by, says the Philadelphia Times. Authors of established reputation are in several cases discarding their pen names, while the younger writers are for the most part using their own signatures.

In fact, when one comes to look over the field there is not a modern author of repute completely screened behind an assumed name. "The Duchess" up to within a short time succeeded in keeping her identity veiled. She is, however, now writing under her own name as Mar-

now writing under her own name as Margaret Hungerford.

"J. S., of Dale," has entirely discarded that name, and all his books will hereafter be published under his own name. "Sydney Luska" appends his real name now to all his books.

"Ouida" is writing her first article mader her own signature of Lonise de la Ramee. Marion Harland, ik Marvel, Mrs. Alexander, Mark Twain, Jennie June, Edna Lyall—all these are now becoming merely the shadow of the real names which they ouce so effectually screened from public knowledge.

The reasons for this change of feeling are several. First, authors are realizing more and more that with two names they have two reputations to make, and in these days of literary competition it fills the hands of any ordinary man to succeed in making one.

ceed in making one.

Secondly, writers are becoming more convinced that the strength of one's peronality in their work is an essential of Thirdly, publishers are more reluctant

to place pseudonyms on the title pages of their author's books than they were fifteen And thus are our methods changing in literature as well as in everything els-

of Edinburgh, who has just passed away at the age of seventy-nine.

She was a child of the regiment. Her father was Quertermaster-Sergeant Max well, of the Seventy-fourth Regiment, whose wife followed, with him, the fortunes of the army through the Peninsular War.

Ars. Allan was born in a convent at Lisben, was christened by a Portuguese priest, though her parents were Protestants, and while yet a mere infant scaled the walis of Badajoz strapped upon her mother's back. With her mother, she was also on the field of Waterloo.

Her girthood was spent in barracks, or in the baggage-waggon moving from places to place, and at the age of seventeen the wife of Color-Sergeant Allan, of the same regiment.

Her wanderings again commenced, and her family, consisting of nine children were born in different parts of the world—Canada. India, the West Indies and Ireland. Bulles, Mess J. No. 11, Brooklyn.
